

ABOUT US

DayOptics

Founded in 2005, DayOptics, Inc. is one of China's leaders in comprehensive optics manufacturing. From its inception, DayOptics has focused on the optical field. Our products include precision optics, lens assemblies, laser assemblies and others. DayOptics is committed to becoming a trustworthy brand of optical components and providing complete solutions for laser application systems.

DayOptics provides the best optics solutions for domestic and foreign customers. Products are delivered to China, Japan, Russia, the Middle East, Germany, the United States and other countries.

APPLICATION

TO SIMPLIFY AND BEAUTIFY OPTICAL MAKING

Fiber Laser

DayOptics offers various precision optical components for Fiber Coupling Modules, such as SAC Lens, high-power optical fiber polishing/coating, high-power polarization beam splitters, and wave plates, etc.

Biomedical

DayOptics offers optics for biomedical devices, including endoscope systems, flow cytometers, and DNA sequencers. These optics comprise optical filters (long-wave pass/ short-wave pass/ band pass filters), polarizing beam splitters, lenses, and assemblies.

Optical Communication

Various optical components and fiber optic devices are used in transceiver optical modules. The main components include optical filters, polarizing beam splitters, non-polarizing beam splitters, etc.

Consumer Electronics

Precision optics is one of the key enabling technologies for VR/AR applications. At present, the technology and application of VR/AR are in the early stage of development. We can provide aspherical lenses, spherical lenses, Fresnel lenses, etc.

Defense

DayOptics offers low-light night vision lenses for military, law enforcement, security, hunting, exploration and other fields.

OUR CAPABILITIES

Optical Coating

- IBS coating
- IAD Coating
- APS IAD Coating
- OTFC IAD coating

Optical Bonding

- Applies to different materials
- No Adhesive
- High Laser Damage Threshold

Precision Optics

- Precision cold processing production
- Plane, Spherical, Cylindrical, Polarized, etc.

Self-test System

- Systematic advanced testing
- High power self-test

Customization

- Best optical customized solution

PRODUCT

Optical Components

- Cylindrical Lens
- Spherical Lens
- Mirror
- Prism
- Glan Prism
- Wave plate
- PBS
- Window
- Crystal
- End Cap
- over more 200 types

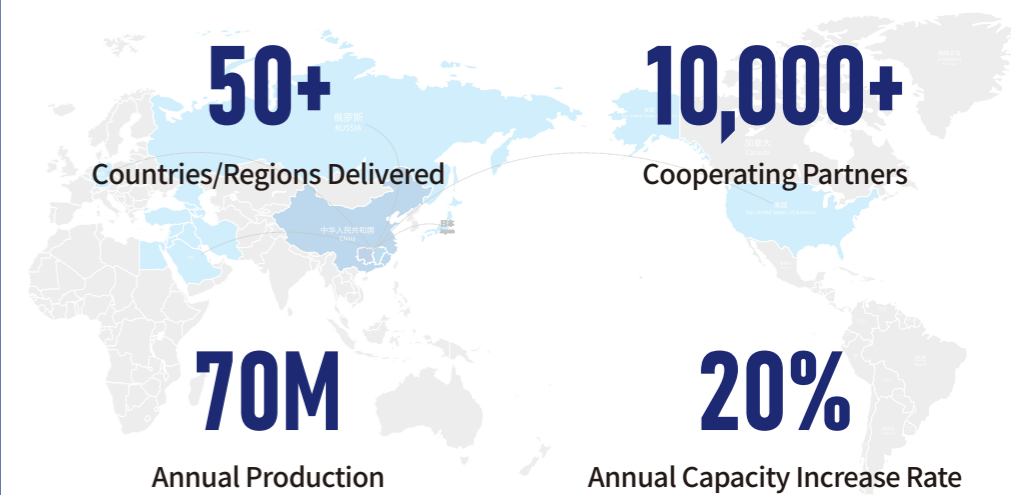

Optical Assembly

- No Distortion Lens
- Low-Light Night Vision Lens
- Panoramic Lens
- Ultra Wide-Angle Lens
- Machine Vision Lens
- Laser lens etc.

Various, Customized, Minimized Cost Solutions For You

One Stop Provider For Optics Solutions

Headquarters
Ningxiang, Hunan

Hunan Dayoptics, Inc.

R&D and Production of high-power optics, lens assembly and laser assembly in various fields

Subsidiary
Fuzhou, Fujian

Fujian Dayoptics, Inc.

R&D and Production of optical components and crystals

R & D Base
Wuxi, Jiangsu

Joint Optics Laboratory of Jiangsu Industrial Technology Research Institute

R & D Center
